PROFILE

Hello!!, I am Krishna Bahadur Ojha, an engineering guy who is interested in coding, thinking new ideas and solving the problems. I have participated in many competitions and completed some online courses of machine learning and data science.

The online courses that I completed are

- Machine learning from A to Z by udemy.
- Datacamp course for data science

Programming languages with which I am familiar are:

C, C++, Python, Java, PHP and JavaScript.

HOBBIES

✈ Travel   📚 Reading

🎵 Music   💳 Coding

EDUCATION

TRIBHUVAN UNIVERSITY
2016-2020

● **Bachelor in electronic and communication**

I am 4th year running bachelor level student in Thapathali engineering campus in the stream of electronic and communication engineering.

HSEB
2014-2015

● **Intermediate level**

I have completed intermediate level designed by HSEB in Ambition college as a physical group with an aggregate percentage of 81.20%.

EXPERIENCE

College Projects
2015-2016

● **Member**
- Glucose prediction system for sugar patients using RNN Algorithm.
- Smart shutter Alert system using ATmega32 and c programming language.
- Car counting using OpenCV and c++ language.

Yantra learning
2019/2020

● **Participant**

I have participated in yantra learning 7.0 with "mobile application-based cataract detection system" and in 8.0 with "Handwritten Nepali document digitization using computer vision and CNN".

SKILLS

Coding		Animation	
Layout		ML	
Data mining		Editing
